

## *Reflect-O-Crete Architectural Color Hardener*

Reflect-O-Crete Architectural Color Hardener is a specialty formulated, dry-shake, colored surface hardener that contains premium graded reflective aggregates and is designed to be lightly exposed using CSI Surface Etch or *Surface Gel Tek* gelled acid. It is used for coloring, hardening and conditioning freshly placed concrete flatwork when a more refined lightly exposed surface is desired.

### ***Reflect-O-Crete Architectural Color Hardener Product Benefits***

- Reflect-O-Crete Architectural Color Hardener is a cost effective method for obtaining a uniform lightly exposed colored concrete surface with reflective aggregates. All of the aggregates are contained in the product eliminating the need to surface seed aggregate or pay for through body aggregate in the concrete.
- Reflect-O-Crete Architectural Color Hardener is offered in 9 standard colors with 3 different reflective aggregate types. Custom colors and aggregate blends are available upon request.
- Reflect-O-Crete Architectural Color Hardener increases abrasion resistance and increases coefficient of friction reducing slip issues. Proper use of Reflect-O-Crete Architectural Color Hardener can increase surface strength.
- Used in conjunction with CSI Release Powder\* and *Surface Gel Tek*, gelled acid Reflect-O-Crete Architectural Color Hardener can be used to create reflective stamped and textured surfaces.
- Reflect-O-Crete Architectural Color Hardener is an excellent choice for the following types of projects: Lightly exposed surfaces, driveways, sidewalks, pool decks and a variety of architectural concrete treatments that would benefit from aggregate reflectivity.
- Performs well in properly air-entrained, surfaces in cold, harsh climate exposed to freeze-thaw cycles.
- With its blend of select and graded aggregates, architectural cements, and plasticizers, Reflect-O-Crete Architectural Color Hardener creates surfaces that are substantially harder and more wear-resistant than concrete not treated with color hardener.
- Reflect-O-Crete Architectural Color Hardener is an excellent choice for coloring concrete in order to achieve lighter colors and/or more brilliant reflective surfaces.

*Since 1996 ChemSystems, Inc. has been specializing in additives and color for all your concrete needs. Helix Color Systems provides a fresh and innovative approach to decorative concrete by providing products and services for the discriminating installer, homeowner or designer. We not only offer a full line of products, but specialize in tailoring products and colors to meet a specific project or customer requirement. Helix Color Systems are sold through a network of distributors who specialize in decorative concrete.*

- Reflect-O-Crete Architectural Color Hardener is offered in 9 standard colors with 3 different reflective aggregate types. Custom colors and aggregate blends are available upon request. Refer to CSI/Helix color charts for additional selections, or we can match any custom color as well.

- Reflect-O-Crete Architectural Color Hardener saves time and money by eliminating reflective aggregates hand broadcast and or through body fill techniques.

- By using one of the following products and or methods (CSI Surface Etch 01 or 03, dilute acid wash, or Surface Gel Tek HD24 gelled acid) Reflect-O-Crete Architectural Color Hardener can be exposed within 1- 4 days to create a stunning and architecturally refined surface.

- Reflect-O-Crete Architectural Color Hardener is available in 60-pound pails or plastic lined bags. Custom packaging is available for an additional charge. Contact ChemSystems Inc. for details.

- Coverage rates may vary depending on color choice, application method, and other local conditions. Minimum for all colors is 1 lb. per square foot.

\* The colors on this color card approximate, as closely as possible, the appearance obtained in natural light. Variables, including job conditions and finishing techniques, affect the final color. If color accuracy is critical, a pre-construction sample utilizing actual job site materials and construction methods is required. Information contained in this brochure is to the best of our knowledge, true and accurate but all recommendations or suggestions are made without guarantee. Since the use of the products is beyond our control, ChemSystems, Inc. disclaims any liability incurred in connection with the use of our products and any information contained herein.
