The colors on this chart are approximate based on laboratory samples made from 5 sack mix concrete, using Type 1 gray Portland cement, sand, and water placed at a 4 to 6 inch slump. If color accuracy is critical, a pre-construction sample is required using actual job site materials and construction methods. Information contained in this brochure is to the best of our knowledge, true and accurate. All recommendations or suggestions are made without guarantee. Since the use of the products is beyond our control, Decorative Concrete Supply, Inc. disclaims any liability incurred in connection with the use of our products and any information contained herein.

INTEGRAL COLOR

YOUR SOURCE FOR COLORFUL CONCRETE

Helix Integral Colors will transform any cement based project from ordinary into extraordinary. Easy to use, Helix Integral Colors are the economical coloring choice that will turn any concrete project into a premium design element. As a leading manufacturer of decorative concrete admixtures, Helix has been combining art and science in concrete since 1996.

INTEGRAL COLOR BENEFITS:

- Helix Integral Color pigments are available in a wide variety of standard colors, with custom colors and color matching also available.
- Helix Integral Color is available in bags or pails and various packaging sizes, ranging from bulk to individual batch sizes. Custom packaging is also available. Contact us for help determining which packaging options best fit your needs.
- Color name, number, and dosage rate is based on mixing with 94 lb sack of cement.
