

## Technical Data Sheet

### Matte Additive

---

#### DESCRIPTION

MATTE ADDITIVE is a non-hazardous additive that will convert a high gloss, solvent-based acrylic sealer to a matte finish sealer. The material has a low density, allowing it to remain suspended in low-viscosity systems.

#### FEATURES

- Matting finish
- For solvent-based sealers
- Convenient
- Reduce inventory

#### MIXING

Add two 8 oz scoops of uncompacted MATTE ADDITIVE to 1 gallon of clear concrete sealer or one full container per 5 gallons of sealer. Mix well and continue to mix every 15 minutes to avoid settling. Wear dust mask and eye protection.

#### APPLICATION

The MATTE ADDITIVE should be applied into the second coat on more porous surfaces such as pavers. Roll the sealer onto the surface and immediately back roll to ensure even application.

#### CLEANUP

Cleanup with any solvent suitable for the sealer being used.

#### Technical Data:

Flash Point:	N/A
VOC:	0 g/L
Solids by weight:	100%
DOT:	Non-hazardous

#### HMIS

Health 1	Flammability 1
Reactivity 0	Protection E
